

GONDWANA GEOLOGICAL MAGAZINE

Volume-9 – June 1995

CONTENTS

A: GEOCHEMISTRY

1. *Deshmukh A.N., Wadaskar P.M. and Malpe D.B.* | Fluorine in Environment: A Review
2. *Deshmukh A.N., Shah K.C., and Sriram AjJpulingam* 21 Coal ash: A source of Fluoride pollution, A case study of Koradi Thermal Power Station, district Nagpur, Maharashtra.
3. *Srivastava B.N., Deshmukh A.N., and Kodate Jaya K* 31 the impact of groundwater composition on fluorite Solubility product: A case study of selected Indian Aquifers.
4. *Kodate Jaya, K, Sharma .J: S., Wadaskar P.M. and* 45 *Gajbhiye RoD.* Hydrochemistry of calcareous Vindhyan aquifers of Florosis endemic Korpana tehsil, Chandrapur district, Maharashtra.
5. *Deshmukh A.N., Kapil Pasin and Radhakrishnan C.J:* 55 Geochemistry of Dongargaon fluorite deposits, tehsil Warora, district Chandrapur, Maharashtra.
6. *Dev Burman G.K, Birendra Singh and Pankaj Khatri* 71 Hydro geochemical studies of groundwater having high fluoride contents in Chandrapur district of Vidarbha region, Maharashtra.

B: BIOGEOCHEMISTRY

7. *Batra Jyoti, Vishpute .IB., Deshmukh A.N. and Vali Sabiha* 81 Contribution from rock, soil and groundwater to fluorine content of foodstuffs grown in some selected villages of Bhadrawati tehsil, Chandrapur district, Maharashtra.

8. *Jyoti Kumari P., Ashlesha P., Kodate Jaya and 91 Vali Sabiha* Fluoride partition factor between coexisting soil and foodstuffs: A case study of 3elected Florosis endemic village of Korpana and Rajura tehsil, district Chandrapur, Maharashtra.

C: NUTRITION

9. *Ashlesha P., Jyothi Kumari P. and Vali Sabiha* 101 Fluoride ingestion of the population of fluorosis endemic Dhoptala village in Chandrapur district, Maharashtra.

10. *Vaidya S.M. and Patwardhan, A.A.* 115 Impact of fluoride ingestion in dental and skeletal Florosis.

D: MEDICINE

11. *Arora Deepak, Kusnale Atul and Hazare.v JI:K.* 123 Fluoride and Dental health

12. *Das P.K. and Wahab S.N.* 133 A study of prevalence and some epidemiological factors related to Florosis in two villages in Chandrapur district, Maharashtra.

13. *Vali Sabiha and Deshmukh A.N.* 139 Biochemical impact of fluorides in drinking water on development of dental and skeletal Florosis.

E: IMPROVEMENT MEASURES

14. *Deshmukh AN., Sriram Appulingam, Adhau Pramod and Chitale AA.* 151
Utilisation of Silewara Coalfield water for fluoridisation of water supplies to Nagpur Municipal Corporation.
15. *Sriram Appulingam, nspute J.B., Adhau P.S. and Batra Jyoti* 157
Impact of different methods of preparation on fluoride content of tea.
16. *Deshmukh A.N., and Chakraborti P.K.* 169
Hydro chemical and hydrological impact of natural aquifer Recharge of selected Florosis endemic areas of Chandrapur District.
17. *Chakraborti P.K., Welekar K.G. and Deshmukh A.N.* 185
Direct aquifer recharge as a method for lowering Fluoride content of groundwater of selected Florosis Endemic areas of Chandrapur district.
18. *Deshmukh A.N., and Kodate Jaya* 197
Cost effective and innovative structures for direct recharge of aquifers of Florosis endemic areas. A case study of Chandrapur district.
